EXPERIENCE

Leidos — San Diego, CA
Full Stack Software Engineer, Cybersecurity & SIGINT — *Jun 2021 - Aug 2023*

- Collaborated closely with cross-functional teams and contributed to the implementation of multiple features within a large-scale web application using Java and SmartGWT, resulting in a 15% increase in project efficiency.
- Facilitated the development, implementation, and demonstration of the DIAS File Parser, a pivotal feature designed for specialized file types using Java and PostgreSQL, ensuring rigorous validation of incoming files.
- Led the development of comprehensive unit tests using JUnit to validate web application functionality, reducing bug reports by 20% and ensuring a reliable software product.
- Conducted multiple sprint planning sessions with peers to define, scope, prioritize, and build impactful features at a high velocity, ensuring minimal errors during the development process.
- Actively engaged in design and code reviews, contributing to the maintenance of high development standards.

Northrop Grumman — San Diego, CA
Software Engineer, UAV Ground System — *Aug 2019 - May 2021*

- Designed and implemented a comprehensive automated test suite with 100+ tests using Python to rigorously test several proprietary applications, resulting in a 50% reduction in cycle time for hundreds of tests.
- Partnered with a Senior Engineer to facilitate the seamless migration of an entire project codebase from C# to Python, while meticulously preserving the integrity of all core functionalities.
- Supported a DevOps team to integrate automated test scripts into a CI/CD Pipeline using Jenkins, enabling more efficient management of existing software and increasing overall project efficiency by 20%.
- Adhered to Agile principles, actively participating in tri-weekly Sprint meetings, fostering a collaborative team environment to drive progress.

Sheek Media — San Diego, CA
Software Engineer, Frontend — *Jan 2018 - Aug 2018*

- Collaborated with a team of developers to revamp the design and functionality of local business websites, focusing on increasing customer traffic and simultaneously enhancing SEO performance.
- Led a team of frontend developers to design and launch Sheek Developer+, an online course aimed at facilitating web development education and practice, attracting over 500 active users within the first month of release.
- Created interactive modules and animations by leveraging HTML5, CSS3, and JavaScript to foster increased user engagement and facilitate a deeper understanding of diverse subject matter.

PROJECTS

React Portfolio Website — San Diego, CA
*React.js, Tailwind CSS — https://github.com/mhayeri/Portfolio-Website : **Portfolio*** — *Jan 2024*

- Designed a single page application, portfolio website using modern frontend tools such as React.js and Tailwind CSS that showcases my work experience, technical skills and projects.

CampFinder — San Diego, CA
JavaScript, Node.js, Express.js, MongoDB, Bootstrap — github.com/mhayeri/CampFinder — *June 2023*

- Implemented a full-stack application that replicates key features of Yelp. Allows users to create an account in order to discover, review, and manage campgrounds and reviews.

EDUCATION

San Diego State University — San Diego, CA
Bachelor of Science in Computer Science — *May 2019*
